1. Applicant's election with traverse of Group I, Claims 1-7 in Paper No. 3 is acknowledged. The traversal is on the ground(s) that means for merging the contents of the buffer disclosed in the specification includes luminance value. This is not found persuasive because claim 8 does not recites any luminance value, the steps of modifying the value, and overwriting each pixel of image data.

2. The requirement is still deemed proper and is therefore made FINAL.

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.

Art Unit: 2612

- (1) Field of the Invention.
- (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

It is noted that the claim section does not commence on a separate page.

3. This application is in condition for allowance except for the presence of claims 8-11 to an invention non-elected with traverse in Paper No. 3. Applicant is given ONE MONTH or THIRTY DAYS from the date of this letter, whichever is longer, to cancel the noted claims or take other appropriate action (37 CFR 1.144). Failure to take action during this period will be treated as authorization to cancel the noted claims by Examiner's Amendment and pass the case to issue. Extensions of time under 37 CFR 1.136(a) will not be permitted since this application will be passed to issue.

The prosecution of this case is closed except for consideration of the above matter.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Miller et al discloses an interface for an electronic camera that includes an overlay bar.

Gough et al discloses an apparatus that can provide an overlay bar.

Kawai discloses an image display that includes an overlay image.

5. Claims 1-7 are allowed.

The prior art of record does not suggest or discloses a method for displaying an overlay bar on a digital imaging device comprising the step of displaying the image by modifying the luminance value of each pixel of the image data that falls within the area of the overlay bar; and overwriting each pixel of the image data that falls under a pixel of the text in the overlay bar wherein the modifying the luminance values of the image data provides the overlay bar with a translucent appearance thereby to enable a user to see the image through the overlay bar in combination with other elements.
